FM APPROVED

PERMA-TITE RADIUS COPING

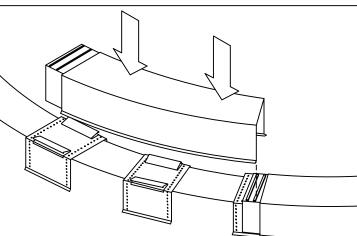

FLAT OR TAPERED VERSION - 2'-0" O.C.

INSTALLATION INSTRUCTIONS

NOTE: Position roof membrane on top of the wall covering the treated wood nailer(s) or substrate completely. Allow 1/2" minimum excess membrane beyond nailer where applicable. NRCA Requirement.

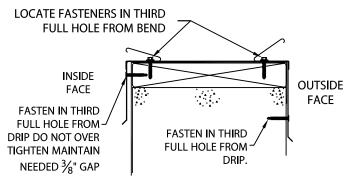

Locate and fasten anchor clips at 2'-0" O.C. with provided fasteners for substrate using the third full hole from bend (see detail A)

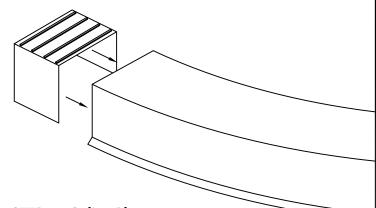

STEP 3 - Coping Cover

Remove release paper from right two factory applied sealant strips on the splice plate in the coping section. Install 4'-0" radius coping sections from left to right. Place coping into position and press downward until snap-lock occurs.

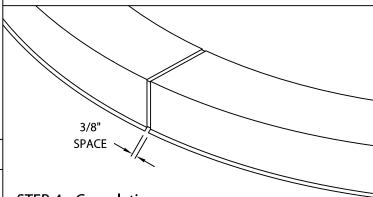

ANCHOR CLIP FASTENING-DETAIL A

STEP 2 - Splice Plates

Remove release paper from left two sealent strips. Insert splice plate into the right end of radius section.

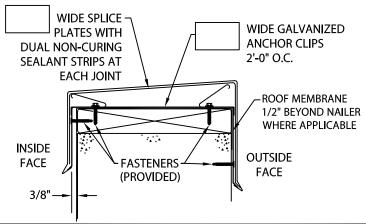

STEP 4 - Completion

Continue installing coping with a 3/8" space at splice joints to allow for thermal expansion. Field cut where necessary using a fine tooth hacksaw or snips.

NOTE: REMOVE PROTECTIVE FILM IMMEDIATELY.
